

## **AREVA SELECTS GOODWIN BIOTECHNOLOGY INC. AS A PARTNER FOR ITS NEW CANCER TREATMENT**

USA - Plantation, FL, June 30<sup>th</sup>, 2008 – **Goodwin Biotechnology Inc.** (GBI) disclosed today that it has begun process development toward AREVA's lead-212 initiative to treat cancer. As part of this agreement, GBI will manufacture a new conjugated drug that will be radiolabeled by the NCI with lead-212. AREVA's long-term expertise in the nuclear industry allowed for the production of this radioisotope previously considered a scarce resource.

Said GBI CEO Stephanie Finnegan, "We are proud to have been chosen for this project, which could revolutionize radiopharmaceuticals."

### **About Goodwin Biotechnology Inc.**

GBI is one of the earliest contract manufacturing organizations (CMOs), established in 1992. GBI specializes in process development and cGMP compliant mammalian cell culture manufacturing of bio-therapeutics for pre-clinical studies through Phase III clinical trials. GBI's clients include small to mid-sized biotech companies throughout North America and Europe, universities, renowned cancer research institutes and various branches of the U.S. government. GBI offers its clients the experience of an established US Contract Manufacturing Organization, and provides services in a fully integrated offering, including process development, cell banking, GMP manufacture, conjugation, vialing, and distribution to the clinical trial sites.
